## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-83 and 140-143 drawn to a method of introducing a nucleic acid into a cell and kits therefor, classified in class 435, subclass 455+.
- II. Claims 84-139, drawn to a method for *ex vivo* gene therapy, classified in class 514, subclass 44.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because patentability of *ex vivo* gene therapy is not only dependent the method of delivering a nucleic acid into a cell, to which the subcombination is directed, but also on the method of delivering the cell into an organism and the effectiveness of the therapy in treating the disease. A method of *ex vivo* gene therapy would be patentable regardless of the method used to introduce the nucleic acid into the cell. The subcombination has separate utility such as to delivery nucleic acids into cells for heterologous expression *in vitro* or in the construction of transgenic plants and mice.

Art Unit: 1636

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel M Sullivan whose telephone number is 703-305-4448. The examiner can normally be reached on Monday through Friday 8-4:30.
